

Jillur Rahman

Front-end Developer

Detail-oriented Front-End Developer specializing in React, Next.js, and Tailwind CSS — turning complex Figma designs into fast, accessible, production-ready interfaces. Brings real-world Shopify experience developing and customizing Liquid-based themes for high-converting storefronts. Driven by clean code, performance, and user-first thinking at every stage of development.

Experience

- 2023 – 2024
Dream IT | Ulipur, Kurigram, Rangpur, Bangladesh
Front-end Developer

At DreamIT Solution, worked as a Front-end Developer building responsive user interfaces using React, Next.js, and Tailwind CSS. Transformed Figma designs into pixel-perfect, reusable components while maintaining clean code standards and ensuring performance, scalability, and consistency in a fast-paced, collaborative environment.
- 2025 – Present
Akta Service | Remote | Based in UK
Shopify Developer

Worked as a Shopify Developer, building and customizing Shopify storefronts for clients. Responsibilities included developing and modifying themes using Liquid, implementing custom sections, and integrating third-party apps. Focused on delivering high-quality, conversion-optimized e-commerce experiences with attention to performance and user experience.

Projects

Econet – Environmental Sustainability React JS Template

Front-end Developer

- Developed a responsive React.js website using Tailwind CSS, GSAP, and Swiper.js with smooth animations and interactive UI components.
- Implemented custom features such as audio meter and countdown timers to enhance dynamic user engagement.
- Optimized performance and accessibility by writing modular, reusable code and collaborating with designers for pixel perfect UI delivery.
